**RE: RECOMMENDATION LETTER FOR RAYMOND NYAKUDANGA**

---

Dear Sir/Madam

It is a great pleasure to recommend Raymond Nyakudanga to be part of your institution. I have known Raymond throughout the course of his degree program and have lectured him in some courses which include Electrical Machines and Drives, MEMS and Industrial Automation. The final year research and design and make projects were also both under my supervision and have no doubt of his abilities in both philosophical and general academic performance. He is also a highly reliable individual who relates well with other students and superiors.

Also having supervised him during his industrial attachment I can testify on his practical skills, innovation and problem solving. The supervisors at the attachment placement where the student was trained for a year, mentioned that he was a very good student who was eager to learn and applied herself fully in all the engineering department's activities.

His academic results being evident, I therefore reaffirm my solid recommendation for Raymond Nyakudanga that he will thrive in any graduate school setting and his intelligence, hard work and inquisitive behavior will make him an asset to your institute.

Should you have any queries concerning Raymond's academic background and abilities please do not hesitate to contact me.

Sincerely,

Eng D. Simango
